

Assessment of Optometrists with Overseas Qualifications

This document provides general information for optometrists with overseas qualifications seeking assessment so that they can register and practice as an optometrist in Australia or New Zealand. It also contains information for persons applying for skilled migration to Australia.

1. Assessment for Registration in Australia and New Zealand

Only persons registered with the Optometry Board of Australia (OBA) or the Optometrists and Dispensing Opticians Board in New Zealand (ODOB) are permitted to practise optometry in Australia or New Zealand. Registration information is available on the OBA website at <http://www.optometryboard.gov.au/Registration.aspx> and on the ODOB website at https://www.odob.health.nz/registration_information

Graduates of accredited Australian and New Zealand programs of study in optometry are eligible to apply for registration in Australia and in New Zealand. The approved courses are listed on the OBA website at www.optometryboard.gov.au/accreditation and on the ODOB website at http://www.odob.health.nz/cms_show_download.php?id=812.

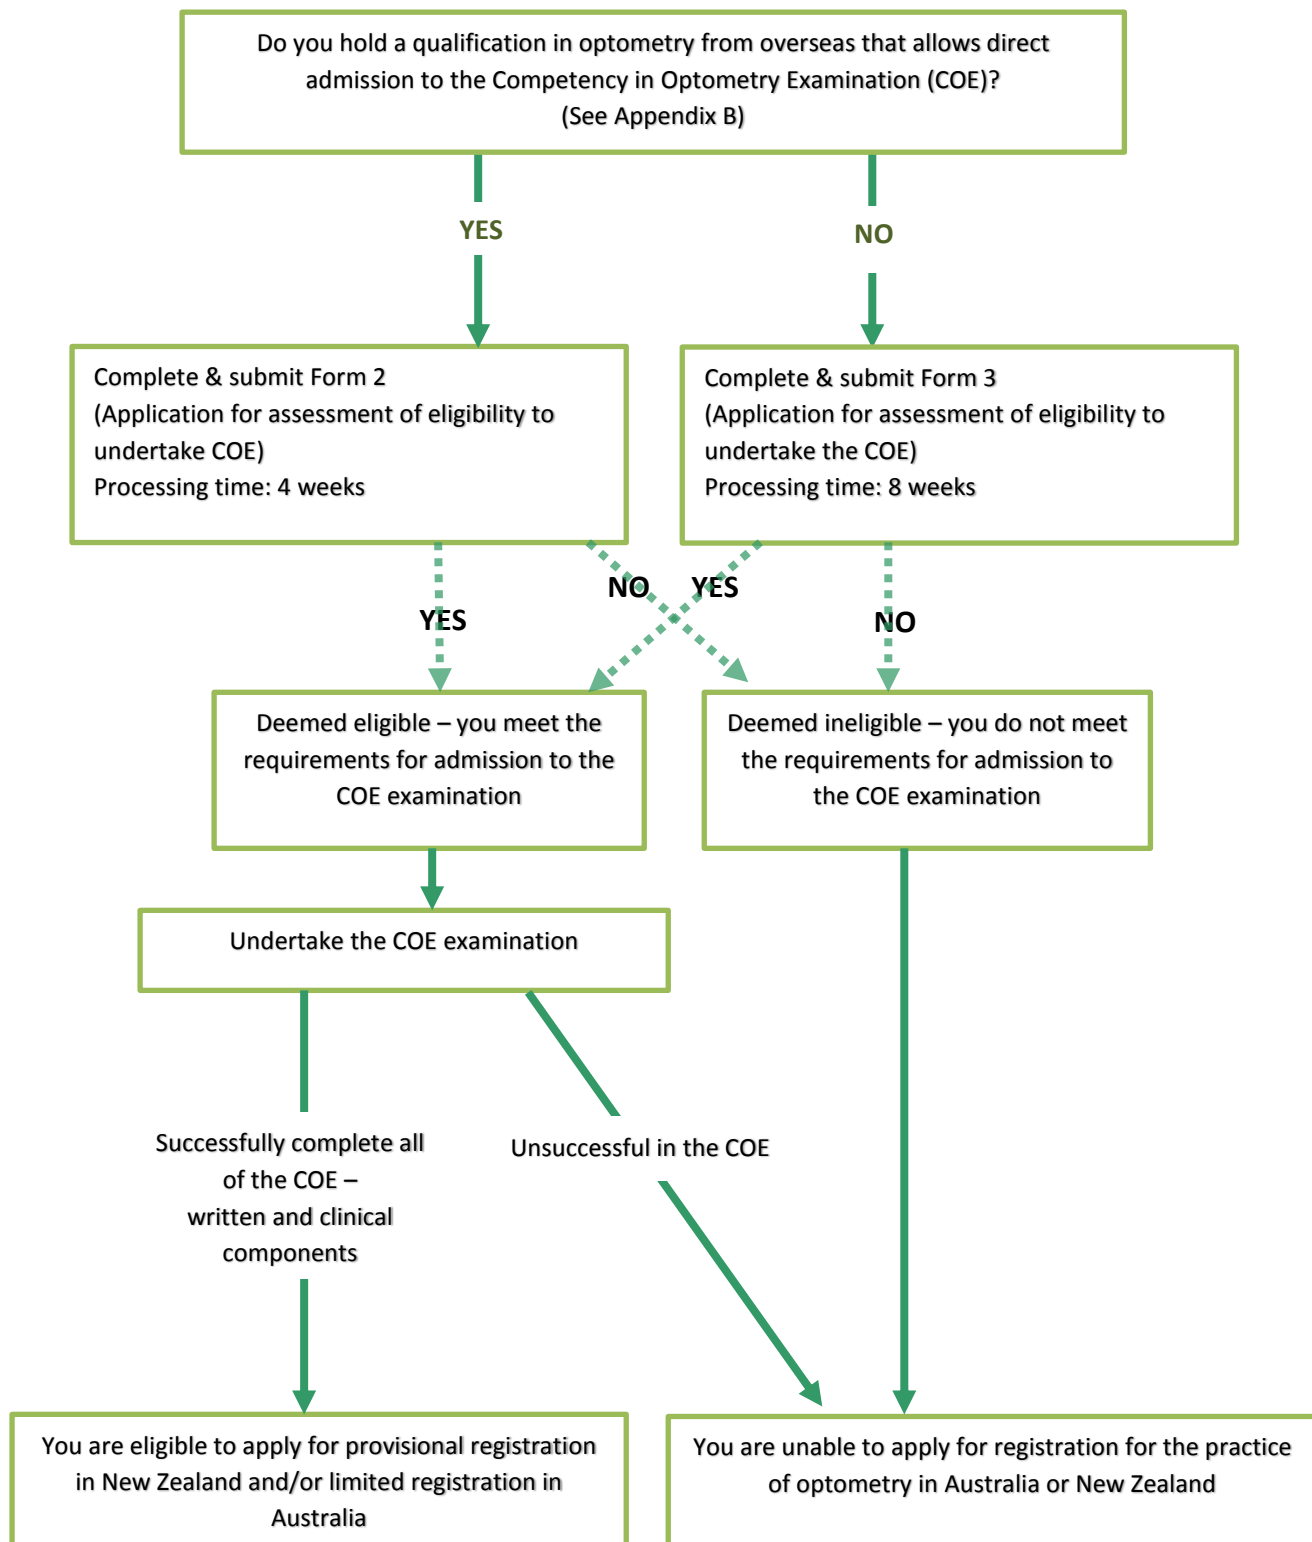

Persons holding a qualification in optometry obtained from an institution outside Australia and New Zealand are required to pass the **Competency in Optometry Examination (COE)** before making application for registration. The COE is conducted under the auspices of the Optometry Council of Australia and New Zealand (OCANZ).

Candidates who successfully complete the COE will be issued with a certificate. The certificate is accepted by the optometry registration boards in Australia and New Zealand as evidence that an entry-level standard of competence in optometry has been met, excluding ocular therapeutics, but does not automatically confer a right to be registered.

The COE certificate issued by OCANZ enables applicants to apply for limited registration in Australia, or for the provisional scope of practice in New Zealand, with the completion of additional training/examination in ocular therapeutics required by both the OBA and the ODOB to meet the requirements of general registration.

The Assessment of Competence in Ocular Therapeutics (ACOT) examination conducted by OCANZ is designed to test the competence of optometrists who hold a qualification in ocular therapeutics obtained overseas. Successful completion of the ACOT enables applicants to apply for general registration in Australia or New Zealand. Alternatively, candidates may undertake an ocular therapeutics course approved by the OBA or ODOB. Separate information regarding the ACOT can be found at <http://www.ocanz.org/assessment-of-competence-in-ocular-therapeutics>.

The final decision to register a person rests with the registration board in the jurisdiction in which the candidate wishes to practise optometry. A registration board may have additional prerequisites for registration such as English language proficiency requirements and evidence the candidate is of good character. Applicants should seek more information from the registration board with whom they propose to seek registration. See Appendix A for contact details of the registration boards in Australia and New Zealand.

2. Migration to Australia or New Zealand

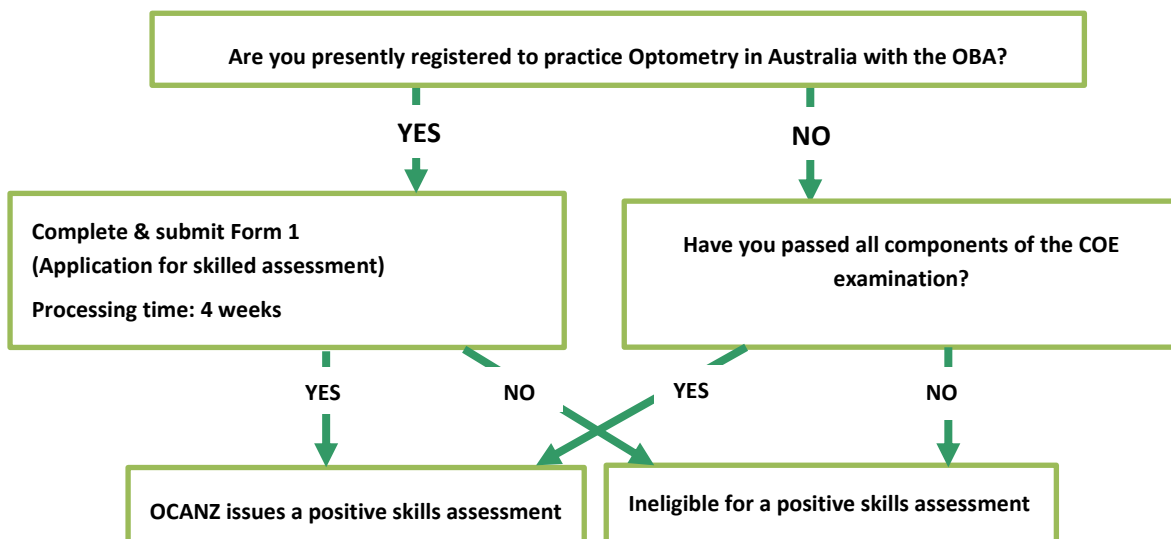

2.1 Skills Assessment for General Skilled Migration to Australia

Skilled migration visas are assessed by a points test. To be granted a visa in Australia under this category, applicants must score enough points to meet the “pass mark”. Points are allocated for skills, age, English language ability, occupation, and Australia work experience and Australian qualifications.

A person intending to migrate to Australia under the General Skilled Migration program must obtain a skills assessment before applying to the Australian Department of Immigration and Border Protection. The applicant has to choose a Nominated Occupation from the Skilled Occupation List (SOL) and then contact the relevant assessing authority directly to have their skills assessed. The Australian government reviews this list annually.

Optometry is currently on the SOL. OCANZ is currently the assessing authority for optometry. Skills assessments can be issued by OCANZ to people registered with the Optometry Board of Australia, and/or who have successfully completed the COE.

Further information about skilled migration can be found at <http://www.border.gov.au/Trav/Work/Work>. Other migration pathways are detailed in the DIABP website <http://www.border.gov.au/>

2.2 Period of validity of skills assessments

Skills assessments issued by OCANZ to optometrists already registered with the OBA are valid for a period of one year. Skills assessments issued after successful completion of the COE are valid for 3 years.

2.3 General Skills Category for Residence in New Zealand

Applicants for residence in New Zealand under the Skilled Migrant Category are assessed by a points system. To be granted residence in New Zealand under this category, applicants must score enough points to meet the “pass mark”.

Points are allocated for qualifications, work experience, offers of employment, age, and settlement factors. In addition, applicants must meet health, character and English language requirements.

Further information on New Zealand's immigration policy and procedures can be obtained from the nearest New Zealand Immigration Service (NZIS) office and from the NZIS website: www.immigration.govt.nz. OCANZ is not involved in NZ migration processes.

3. Assessment of Eligibility to sit the Competency in Optometry Examination

To be eligible to sit for the COE an applicant must provide evidence of successful completion of a course of 4 years full-time study or a course of 3 years full-time study followed by one year supervised clinical practice after which a professional examination is passed.

Applicants holding a qualification listed in Appendix B will be eligible to sit the examination however candidates may still have to undertake further study and preparation to meet the competency standards tested by the examinations.

Applicants not holding such a qualification will be required to have their eligibility to sit for the examination assessed by the OCANZ. The following factors are taken into account when assessing the training in optometry at an overseas institution:

- a) educational prerequisites for entry to the course
- b) length of the course
- c) standard of the institution providing the course
- d) standard of the qualification
- e) course content (minimum 2000 hours of formal instruction of which one third should be instruction in biomedical, visual and optical sciences)
- f) the extent of supervised clinical training (minimum 400 hours of clinical experience in the direct care and management of patients under supervision of experienced clinical instructors)
- g) whether the qualification held entitles registration to practice independently in the country of origin

An assessment of the applicant's eligibility will be made based on the information requested in the Form 3 application form, available on the OCANZ website.

4. English Language Skills

A comprehensive knowledge of English is essential to practise optometry in Australia and New Zealand. The OBA and the ODOB have specific English Language Skills registration requirements. For information regarding registration standards for English language skills please refer to the OBA at www.optometryboard.gov.au and the ODOB at www.odob.health.nz.

OCANZ does not require a candidate to provide any evidence of English Language competency in order to sit the COE, but advises that the OBA requirements are indicative of the standard of English Language competency necessary to attempt the COE.

5. Competency Standards in Optometry

The 'Competency Standards' list the minimum standards of knowledge, skills and attitudes that a new graduate entering employment as an optometrist needs to meet, in order to perform to an appropriate standard in the workplace. The COE tests the ability of the candidate in the specified areas addressed in the Competency Standards. These Competency Standards are further detailed in the OCANZ Examination Guide at <http://ocanz.org/competency-in-optometry-examination/candidate-guide>.

6. The COE Examination Format

The Competency in Optometry Examination is in four parts, two written and two clinical.

Written examination (2 parts):

- Diagnosis and Management examination (one 3-hour written paper covering basic biomedical, vision and optical science and clinical science, comprising 132 multiple choice questions)
- Clinical Science examination (one 3-hour short answer question paper examining the candidate's skill in patient diagnosis and management)

Clinical examination (2 parts):

- Skills Station examination (clinical skills examination)
- Patient examination (four patient examinations in a clinical setting)

7. COE Examination Guide

The Competency in Optometry Examination Guide contains detailed information about the examination format and content and is available on the OCANZ website.

8. Preparation Courses

There are no preparation courses provided by OCANZ. Applicants may make private arrangements for tuition to assist them to prepare for the COE. Enquiries about tuition can be directed to the Optometry Schools.

Education providers with approved optometry programs are listed on the OBA website at www.optometryboard.gov.au/accreditation.

9. Application Procedures

Application forms for assessment of qualifications can be downloaded from the OCANZ website at www.ocanz.org Applications for both the written and clinical examinations which form part of the COE are not available on the website and are only available from OCANZ once eligibility has been determined.

10. Withdrawal from Examination

Candidates are advised to withdraw from the examination if an accident, illness or other unforeseen factor is likely to adversely affect examination performance.

For more information, refer to the Examination Fees Refund Policy on the OCANZ website.

11. Appeals

Candidates who believe they have cause to appeal in relation to conduct and/or outcome of an OCANZ examination must lodge an appeal with OCANZ within 28 days of the date of the release of the result of the examination.

Appeals against examination results will only be accepted when based on the following grounds.

1. an error in the examination process, including marking; or
2. evidence of unfairness by the person conducting the examination.

Difficulties in preparation or alleged difficulties in tuition are not grounds for appeal. The appeal process is not a means of circumventing the normal assessment procedures. Except in very limited circumstances (such as an error in summation of marks in a written examination or where the review finds that additional marks should have been awarded) a successful appeal will not lead to an examination result being altered. Where an appeal is upheld, the usual outcome is to allow the candidate an opportunity to re-sit that part of the examination that was in dispute without payment of further examination fees. However, this only occurs where the results of the original examination, taken as a whole, show that the candidate had competency close to meeting the standard required, and when a fault in the examination process has been established.

Information about appeals against other decisions including decisions concerning eligibility for admission to the examination is available from the OCANZ Executive Officer.

The first stage of the appeals process is an administrative review to ascertain whether any administrative or procedural error occurred. The fee for an administrative review is published on the OCANZ website and this fee will be refunded in the event that an error is identified and rectified to the candidate's satisfaction. If an administrative review does not find any error, a candidate may ask that the appeal be considered by an independent Appeal Committee. This appeal fee is also on the OCANZ website and is payable for each examination part for which an appeal is lodged. The examination parts are each of the written papers, the skills testing and the patient examinations.

Every effort will be made to deal with all appeals within 3 months from the lodgement of the appeal. The appeal fee will be refunded in the event that the appeal is upheld but is retained to offset the cost of undertaking the independent review if the appeal is unsuccessful.

12. COE Venues

Candidates may sit for the Written Examination in Australia (Melbourne, Sydney, Brisbane, Perth), New Zealand (Auckland), United Kingdom (London), USA (Washington) and South Africa (Johannesburg).

The Clinical Examination is conducted at the Australian College of Optometry in Melbourne.

13. COE Examination Dates

Information about examination dates is available on the OCANZ website at www.ocanz.org

14. Further Information

Further information is available from:

Appendix B: Overseas Optometry Qualifications allowing direct admission to the Competency in Optometry Examination

Applicants with a qualification listed below are eligible to sit for the Competency in Optometry Examination.

1. United Kingdom

A degree in optometry (ophthalmic optics) from one of the institutions approved by the General Optical Council of the United Kingdom obtained on or after 1 January 1965 and successful completion of the pre-registration year and professional examinations conducted by the College of Optometrists.

Name of Institution	Dates	Qualification
Anglia Ruskin University	2000	Bachelor of Optometry (Honours)
University of Aston	95-	Bachelor of Science with Honours in Optometry
	95-	Bachelor of Science in Optometry
	65-94	Bachelor of Science with Honours in Ophthalmic Optics
	65-94	Bachelor of Science in Ophthalmic Optics
University of Bradford	Current	Bachelor of Science in Optometry
	82-	Bachelor of Science with Honours in Optometry (Ophthalmic Optics)
	82-	Bachelor of Science in Optometry (Ophthalmic Optics)
	68-84	Bachelor of Science with Honours in Ophthalmic Optics
	68-84	Bachelor of Science in Ophthalmic Optics
	Current	Bachelor of Science with Honours in Optometry
Cardiff University	95	Bachelor of Science with Honours in Optometry
	95-	Bachelor of Science in Optometry
University of Wales College of Cardiff	93-94	Bachelor of Science with Honours in Optometry
	93-94	Bachelor of Science in Optometry
	89-92	Bachelor of Science with Honours in Ophthalmic Optics
	89-92	Bachelor of Science in Ophthalmic Optics
	Current	Bachelor of Science in Optometry

University of Wales Institute of Science and Technology	66-88	Bachelor of Science with Honours in Ophthalmic Optics
	66-88	Bachelor of Science in Ophthalmic Optics
	Current	Course not offered.
The City University (London)	86-	Bachelor of Science with Honours in Optometry
	86-	Bachelor of Science in Optometry
	65-85	Bachelor of Science with Honours in Ophthalmic Optics
	65-85	Bachelor of Science in Ophthalmic Optics
	Current	Bachelor of Science with Honours in Optometry
Glasgow Caledonian University	90-	Bachelor of Science with Honours in Optometry
	90-	Bachelor of Science in Optometry
	71-89	Bachelor of Science with Honours in Ophthalmic Optics
	71-89	Bachelor of Science in Ophthalmic Optics
	Current	Bachelor of Science with Honours in Optometry
Plymouth University	2014-	Bachelor of Science with Honours in Optometry
University of Ulster	98	Bachelor of Science with Honours in Optometry
	98	Bachelor of Science in Optometry
Institute of Science and Technology University of Manchester	93-	Bachelor of Science in Optometry Bachelor of Science with Honours in Optometry
	67-95	Bachelor of Science with Honours in Ophthalmic Optics
	67-95	Bachelor of Science in Ophthalmic Optics
	Current	Bachelor of Science in Optometry

2. Republic of Ireland

Name of Institution	Dates	Qualifications
Dublin Institute of Technology	1998 -	Bachelor of Science with Honours in Optometry

3. United States of America and Canada

Qualification and training in the United States of America or in Canada at an institution accredited by the Accreditation Council on Optometric Education and graduation from such institution on or after 1 January 1966;

Name of Institution	Dates	Qualification
Canada		
University of Montreal, Ecole d'Optometrie, Montreal	66-	Degree of Doctor in Optometry
University of Waterloo, School of Optometry, Waterloo	66-	Degree of Doctor in Optometry
United States of America		
Ferris State University Michigan, College of Optometry, Big Rapids, Michigan	66-	Degree of Doctor in Optometry
Indiana University, School of Optometry, Bloomington	66-	Degree of Doctor in Optometry
Illinois College of Optometry, Chicago	66-	Degree of Doctor in Optometry
Inter American University of Puerto Rico, School of Optometry	85-	Degree of Doctor in Optometry
Midwestern University Arizona College of Optometry	2013-	Degree of Doctor in Optometry
New England College of Optometry, Boston		Degree of Doctor in Optometry
Northeastern State University, Oklahoma College of Optometry, Tahlequah	66-	Degree of Doctor in Optometry
Nova Southeastern University, College of Optometry, Fort Lauderdale	66-	Degree of Doctor in Optometry
The Ohio State University, College of Optometry, Columbus	66-	Degree of Doctor in Optometry
Pacific University, College of Optometry, Forest Grove	66-	Degree of Doctor in Optometry
Pennsylvania College of Optometry, Elkins Park, Philadelphia, Pennsylvania	66-	Degree of Doctor in Optometry
Southern California College of Optometry, Fullerton, Los Angeles	66-	Degree of Doctor in Optometry
Southern College of Optometry, Memphis	66-	Degree of Doctor in Optometry
State University of New York, State College of Optometry, New York	66-	Degree of Doctor in Optometry
University of Alabama at Birmingham School of Optometry, Birmingham	66-	Degree of Doctor in Optometry
University of California, Berkeley, School of Optometry	66-	Degree of Doctor in Optometry
University of Houston, College of Optometry, Houston	66-	Degree of Doctor in Optometry

University of Missouri, St Louis, College of Optometry,	66-	Degree of Doctor in Optometry
University of the Incarnate Word Rosenbeg School of Optometry	2013-	Degree of Doctor in Optometry
Western University of Health Sciences College of Optometry	2013-	Degree of Doctor in Optometry

4. South Africa

Qualification and training in South Africa from the following institutions and graduation from such institutions on or after 1 January, 1980.

Name of Institution	Dates	Qualification
Rand Afrikaans University (now University of Johannesburg)	67-04	Degree of Bachelor of Optometry
University of Johannesburg	2005-	Degree Bachelor of Optometry Baccalaureus Technologiae in Optometry
Technikon Witwatersrand	1980- 2005	Diploma in Optometry
University of Durban-Westville (now University of KwaZulu Natal)	1980- 2004	Degree of Bachelor of Optometry
University of KwaZulu Natal	2004-	Degree Bachelor of Optometry
University of the Free State	2005-	Degree of Bachelor of Optometry

2. India

Name of Institution	Dates	Qualification
Birla Institute of Technology & Science/ Bausch & Lomb School of Optometry	2000 -	Bachelor of Science in Optometry

3. Hong Kong

Name of Institution

Hong Kong Polytechnic University	1994 -	Bachelor of Science Honours in Optometry
----------------------------------	--------	--
